PROFILE

IT Support Specialist and Computer Science graduate with hands-on experience in system administration, network troubleshooting, and data reporting.

Experienced in researching and implementing emerging AI tools to automate workflows, improve operational efficiency, and support business productivity.

Strong working knowledge of Windows environments, endpoint security, firewall policies, and data analysis using Python, SQL, Excel.

CORE COMPETENCIES

IT Support & Systems Administration | Network Configuration & Troubleshooting | Endpoint Security Deployment | Firewall Rules & Policy Application | ISP Failover & Connectivity Management | Data Analysis & Reporting | AI Tool Research & Workflow Optimization | Documentation & Process Improvement

TECHNICAL SKILLS

Systems & Networking: Windows 10/11 Administration, Hardware Diagnostics, LAN & IP Configuration, DNS & Connectivity Troubleshooting, ISP Switching During Downtime, Basic PRTG Network Monitoring, Basic Sophos Firewall Configuration

Security & Infrastructure: Endpoint Protection Deployment (Kaspersky Installation & Rollout), Application Access Control Based on Company Policy, Firewall Rule Implementation

Data & Analytics: SQL (Basic Queries, Aggregations, GROUP BY), Python (Data Handling & Automation Scripts), Power BI Dashboards, Excel (PivotTables, VLOOKUP, Power Query), Data Cleaning & Reporting

AI & Full-Stack Development: Generative AI Integration (Google Gemini API), Automated Data Extraction (pdf-parse), RESTful API Development (Node.js/Express), Frontend Architecture (React, Tailwind CSS)

Tools & Technologies: Python, SQL(PostgreSQL), Excel, Windows Admin Tools, VS Code, Git(Basic), Google Workspace, PRTG Network Monitor, Sophos Firewall (Basic Admin), Figma, Canva

SOFT SKILLS

Problem-Solving • Analytical Thinking • Clear Communication • Team Collaboration
• Time Management • Technical Documentation

PROFESSIONAL EXPERIENCE

IT Support Specialist

Artee Industries Limited — Lagos, Nigeria (May 2025 – Present)

- Resolve hardware, software, and system-related issues across Windows devices.
- Diagnose LAN connectivity issues, IP conflicts, DNS errors, and general network downtime.
- Switch ISPs during outages to maintain operational continuity.
- Configure and manage laptops, desktops, printers, and POS systems.
- Implement company application policies through firewall rules and system restrictions.
- Perform basic configuration and monitoring using Sophos Firewall.
- Deploy Kaspersky endpoint protection to business locations lacking antivirus coverage.
- Monitor network performance using PRTG Network Monitor for uptime and traffic visibility.
- Maintain documentation of incidents, resolutions, and system setups.

Technical Support Assistant (Internship)

Veritas Kapital Assurance PLC — Abuja, Nigeria (Jan 2023 – June 2023)

- Developed Power BI dashboards for claims tracking and customer retention analysis.
- Analyzed structured datasets using advanced Excel tools.
- Improved reporting efficiency by optimizing data processes.
- Provided hardware troubleshooting and basic network support.
- Assisted in maintaining system reliability across departments.

PROJECT & RESEARCH APPLICATION

CURRENT Project:

Study Sphere | Full-Stack Developer * Developed a full-stack automated learning platform using React, Node.js, and the Gemini API to generate structured study guides and active-recall flashcards from PDFs and notes
